GitHub / Portfolio : <https://jayaprakash-portfolio.vercel.app>

Email : prakashdev2403@gmail.com

Location : Coimbatore, India (open to relocation)

Mobile : +91 7708150324

SUMMARY

Backend Engineer with 3 years of hands-on experience building and deploying scalable web applications across logistics, healthcare, wellness and manufacturing domains. Works as a Backend Developer and Full Stack Software Engineer owning services end to end - PostgreSQL schema design, Node.js, Express.js and NestJS REST API development, automated testing, and deployment on Amazon Web Services (AWS) and DigitalOcean. Strongest in SQL query optimization, database indexing, Redis caching, Docker containerization and CI/CD with GitHub Actions. Works in an Agile team and mentors two junior developers.

SKILLS SUMMARY

- **Languages** JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
- **Backend** Node.js, Express.js, NestJS, REST APIs, RESTful Web Services, MVC, Swagger / OpenAPI
- **Databases** PostgreSQL, MySQL, Redis, Prisma, Query Optimization, Indexing, RDBMS, NoSQL, MongoDB
- **Cloud & DevOps** AWS (EC2, Lightsail, S3), DigitalOcean, Docker, GitHub Actions, CI/CD, NGINX, PM2, Linux
- **Auth & Security** JWT, OAuth 2.0, RBAC, bcrypt, Multi-Tenancy, Rate Limiting, Helmet.js, API Security
- **Frontend** React.js, Next.js, Redux Toolkit, Tailwind CSS, Responsive Design
- **Tools & Testing** Jest, Supertest, Unit & Integration Testing, Git, GitHub, Agile, Scrum, Code Reviews, Postman

WORK EXPERIENCE

FULL STACK DEVELOPER | ACEASSURED

December 2023 - Present

- Own backend architecture for 5 production applications across logistics, healthcare, wellness and manufacturing - schema design through deployed frontend.
- Rewrote heavy reporting queries with Common Table Expressions (CTEs) and partial/composite indexes, sharply cutting response times on endpoints that were timing out.
- Introduced Redis for session storage and hot-endpoint caching, reducing repeated database reads and making dashboards load near-instantly.
- Built GitHub Actions CI/CD running lint, typecheck and automated tests against a PostgreSQL service container, with zero-downtime deploys via NGINX and PM2.
- Review pull requests and mentor 2 junior developers on Git workflow, REST conventions and writing testable request handlers.
- Containerized 2 services with Docker and Docker Compose so a new developer can start the full stack with one command.

PROJECTS

Garment Boss | B2B Garment Supply Chain Platform

July 2026 - Present

- Built a multi-tenant B2B supply chain platform - NestJS API, Next.js portal and Expo React Native app in a Turborepo monorepo over a 47-model Prisma schema.
- Implemented three-way purchase-order / invoice / goods-tally reconciliation with line-level mismatch resolution, and role-based access across five user types.
- Integrated Google Document AI to extract invoice and catalogue data from scanned documents behind a swappable provider interface; 91 Jest suites, CI on PostgreSQL.

Hidden Honey Exclusives | Membership & Subscription Platform

April 2026 - June 2026

- Delivered a full-stack subscription platform - NestJS 11, Prisma and PostgreSQL with a Next.js App Router front end - covering memberships, community and Shopify orders.
- Built Stripe billing with idempotent webhook handling so duplicate deliveries cannot double-charge; generated front-end types from the OpenAPI spec to prevent contract drift.

Causeway | B2B Logistics Platform

May 2025 - October 2025

- Designed MySQL schemas and built Node.js/Express.js REST APIs for shipment tracking, invoicing and delivery management, with multi-payment and collective booking.
- Implemented JSON Web Token (JWT) authentication and Role-Based Access Control (RBAC) with middleware validation across all endpoints.

EDUCATION

Park College Of Engineering And Technology

June 2018 - August 2022 | Coimbatore, India

Bachelor of Engineering (Mechanical Engineering) | GPA : 7.47

CERTIFICATES

React Frontend Development | QTree Technologies, Coimbatore | CERTIFICATE

December 2022
